

The NAB has no right to decide for me or any other XM listener what we should or should not receive on the radio that we pay for. XM provides easy to find information and recreational listening that is important to those of us who drive an hour plus to work everyday. The addition of traffic and weather to XM's services has been a great welcome addition to an already impressive radio service. Please don't let the NAB take away the rights we pay for and deserve to be able to keep.
